

# SAKSHI MULEKAR

Frontend Engineer | React.js | TypeScript | Next.js | Fintech & Trading

Bengaluru, India | sakshimulekar2017@gmail.com | +91 70284 27593 | [linkedin.com/in/sakshimulekar](https://www.linkedin.com/in/sakshimulekar) | [GitHub](#) | [Portfolio](#)

## PROFESSIONAL SUMMARY

Frontend Engineer with nearly 3 years of experience building production-grade fintech and crypto trading products at CoinSwitch, serving a user base of ~2.5 crore (25M+). Strong expertise in React.js, TypeScript, Next.js, and Remix.js, with hands-on experience building transactional trading workflows, real-time interfaces using WebSockets and NATS, D3.js visualizations, RBAC systems, design systems, and reusable component libraries. Experienced in frontend performance, SEO, application security, cross-platform mobile development, and end-to-end feature ownership across web and mobile products. Now targeting SDE-2 Frontend roles where I can own high-scale, high-impact product features end-to-end.

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, HTML5, CSS3

**Frontend Frameworks:** React.js, Next.js, Remix.js, React Native, Flutter, React Hooks, React Query/TanStack Query

**State & Data:** Redux Toolkit, Jotai, GraphQL, Apollo Client, REST API Integration, Firebase, Redis, JWT Auth

**Dev Practices & Tooling:** Git/GitHub, PR Code Reviews, DevTools, Lighthouse Audits, Responsive & Cross-Browser Dev

**Real-Time & Visualization:** WebSockets, NATS (pub/sub messaging), D3.js

**UI / Design Systems:** Storybook, Design Systems, Material UI, Custom Component Library Development, WordPress

**Security & Access Control:** RBAC (Role-Based Access Control), XSS Prevention

**Performance & Observability:** SEO, Web Performance Optimization, New Relic Monitoring

**Domain:** Fintech, Crypto/Web3, Trading Systems

**Mobile Performance & Tooling:** react-native-reanimated, Worklets, three.js/WebGL, NativeWind, EAS (CI/CD & OTA), RevenueCat

## PROFESSIONAL EXPERIENCE

### Software Development Engineer I — Frontend

[CoinSwitch](#) | Bengaluru, India (On-site) | Oct 2023 – Aug 2026

- **Public Website & SEO:** Built CoinSwitch's non-transactional marketing website and SEO-friendly performance pages in Next.js (SSR/SSG), directly supporting organic acquisition and search rankings.
- **Trading Platform & Access Control:** Developed core modules of CoinSwitch Pro's trading portal — 9–10 major features (Update Margin, Smart Investment, Demo Trading, Trading Money, Fee Credits, Crypto Deposit, Future Sub-Account, Trade on Chart) plus numerous smaller enhancements — in React.js and TypeScript, with an RBAC system governing feature and data access.
- **Real-Time & Charts:** Built interactive D3.js charting components and WebSocket-driven live price/order updates; integrated NATS for real-time messaging, improving data freshness on trading screens.
- **Affiliate Platform:** Built the Affiliate Program dashboard and KOL / Master Affiliate Program functionality, enabling partner onboarding, tracking, and commission workflows.
- **Design System:** Led migration off Material UI onto a custom, in-house component library (10–15 core components) and design system, built and documented in Storybook, improving consistency and reducing style overrides across squads.
- **Mobile / Cross-Platform:** Built WebView-based functionality for the mobile app and led its migration to Flutter for improved performance; contributed to React Native development for CoinSwitch's mobile app.
- **Performance, Security & Observability:** Drove frontend performance optimization and XSS-prevention measures; resolved ~100 production bugs; set up New Relic alerting and monitoring, improving incident visibility.
- **Team & Mentorship:** Collaborated within a 14–15 member engineering team; mentored 3 junior engineers and rotated through monthly week-long on-call shifts.

## PROJECTS

### Groommx — AI-Powered Fashion Styling App

Frontend Engineer | React Native, Expo, TypeScript | [Play Store](#)

- **Performance:** Built a performant React Native UI using react-native-reanimated and Worklets, enabling smooth gesture handling and animations on the UI thread; optimized media-heavy wardrobe feeds using image caching and list virtualization.
- **Design System & Mobile Infrastructure:** Built a reusable design system using NativeWind, establishing shared design tokens and reusable components; managed EAS builds, OTA updates, TypeScript, ESLint, and Prettier across the application.
- **Advanced Integrations:** Implemented three.js/WebGL-based 3D experiences, RevenueCat subscription functionality, and a media pipeline using Expo Camera and Cloudinary for image capture and processing.
- **Frontend Architecture:** Designed API contracts and frontend data flows for the AI styling engine, supporting paginated wardrobe data and multi-layered outfit recommendations.

## EDUCATION

### Masai — Full Stack Web Developer

Oct 2022 – Oct 2023 | Relevant coursework: JavaScript, React.js, Node.js, SQL, MongoDB, Data Structures & Algorithms

### Rashtrasant Tukadoji Maharaj Nagpur University (RTMNU)

Postgraduate Degree — Environmental Science | 2019 – 2021 | Grade: A
