

SAKSHI MULEKAR

FRONTEND ENGINEER | REACT.JS | TYPESCRIPT | NEXT.JS | FINTECH & TRADING & AI TOOLING

Bengaluru, India • sakshimulekar2017@gmail.com • +91 70284 27593 • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFESSIONAL SUMMARY

Frontend Engineer with nearly 3 years of experience building high-scale fintech and crypto trading platforms at **CoinSwitch**, serving **~25M+ users**. Specialized in **React.js, TypeScript, Next.js, WebSockets, and Web Performance Optimization**. Proven track record of driving a **30% increase in platform trading volume**, cutting JS bundle size by **35–40%**, elevating organic search visibility into **Top 10 Google rankings**, and pioneering AI-driven mobile migrations (React to Flutter). Strong ownership of end-to-end product lifecycles, design systems, and mobile engineering (React Native, Three.js/WebGL).

CORE TECHNICAL SKILLS

- Languages & Frameworks:** JavaScript (ES6+), TypeScript, React.js, Next.js, Remix.js, HTML5, CSS3/Tailwind
- State & Data Handling:** React Query / TanStack Query, Redux Toolkit, Jotai, GraphQL, Apollo Client, REST APIs
- Real-Time & Visualization:** WebSockets, NATS (Pub/Sub), Three.js/WebGL, Interactive Charting Libraries
- Performance & SEO:** SSR/SSG, Code Splitting, Lazy Loading, Image Caching, Core Web Vitals, Google Lighthouse
- Architecture & Security:** Design Systems, Storybook, RBAC, Content Security Policy (CSP), XSS Prevention, JWT
- AI Tooling & Mobile:** Model Context Protocol (MCP), React Native, Expo, Flutter, react-native-reanimated, NativeWind, EAS
- Observability & Analytics:** New Relic APM, Amplitude, CleverTap, RevenueCat

PROFESSIONAL EXPERIENCE

Software Development Engineer I — Frontend | CoinSwitch

Oct 2023 – Aug 2026

- Real-Time Trading Infrastructure:** Engineered high-throughput, low-latency trading interfaces for CoinSwitch Pro using **React, TypeScript, WebSockets, and NATS pub/sub**, delivering live sub-second price streaming and interactive candlestick charting for **25M+ users**.
- SEO & Next.js Performance Optimization:** Overhauled CoinSwitch's public platform using **Next.js (SSR/SSG)**, boosting Google Lighthouse performance scores from 60% to 92% and securing **Top 10 organic Google SEO search rankings**.
- Design System Migration & Velocity:** Led transition from Material UI to an in-house **Storybook component library**, cutting JavaScript bundle size by **35–40%**, eliminating code duplication, and accelerating feature rebuilding time by **25%**.
- AI-Assisted Mobile Migration (Flutter & MCPs):** Developed an AI-powered migration repository with senior engineers, configuring **Model Context Protocol (MCP)** integrations and custom conversion pipelines (Figma-to-Code, React-to-Flutter) to seamlessly transition legacy WebViews into native Flutter code for a smoother mobile UX.
- Core Business & Monetization Features:** Built the **Master Affiliate/KOL Dashboard** and **Role-Based Access Control (RBAC)** systems, contributing directly to a **30% surge in total platform trading volume**.
- Observability, Quality & Onboarding:** Enforced **Content Security Policies (CSP)**, XSS sanitization, and **New Relic APM alerting** with **Amplitude/CleverTap** analytics; authored comprehensive technical documentation and architecture guides to streamline new developer onboarding and resolve **100+ production issues**.
- Cross-Functional Ownership:** Spearheaded feature delivery from discovery with PMs, Designers, and QA squads to deployment, consistently shipping major releases ahead of project timelines while mentoring junior engineers and leading PR code reviews.

FEATURED PROJECT

Groommx — AI-Powered Fashion Styling App | [Web App](#) • [Play Store](#)

Frontend Engineer

- Performant Mobile UI & Animations:** Built gesture-driven mobile UI using **react-native-reanimated** and **Worklets** for 60 FPS UI-thread animations; optimized media-heavy wardrobe feeds using list virtualization and image caching.
- Design System & CI/CD Pipeline:** Created a reusable mobile design system using **NativeWind** with shared design tokens; managed EAS build pipelines, over-the-air (OTA) updates, and strict TypeScript/ESLint standards.
- 3D Visuals, Monetization & Media:** Integrated **Three.js/WebGL 3D components**, RevenueCat in-app subscription paywalls, and an image capture pipeline using Expo Camera and Cloudinary.
- AI Integration & Frontend Data Architecture:** Designed API contracts and state flows for the AI styling engine, powering paginated wardrobe queries and multi-layered outfit recommendation UIs.

EDUCATION & RECOGNITION

Full Stack Web Development Program — Masai

Oct 2022 – Oct 2023

Curriculum: Data Structures & Algorithms, JavaScript, React.js, Node.js, SQL, MongoDB

Postgraduate Degree in Environmental Science — RTMNU (Grade: A)

2019 – 2021

Game Changer Award — CoinSwitch | Awarded for exceptional technical ownership across trading systems.

Award
